

AS EXPERTS IN THE FIELD, YOU WON'T FIND A MORE DEDICATED TEAM. WE PRIDE OURSELVES ON OUR WEALTH OF KNOWLEDGE AND EXPERIENCE.

- Our large premises in the UK, just north of London, is where it all happens. We are equipped with state of the art facilities to produce high quality remanufactured ink cartridges.

Over ten years in the business

We have over ten years' experience in remanufacturing large format ink cartridges for a wide range of well-known printer brands. We deliver our cartridges to many countries across the world.

Great value for money

We remanufacture our products from used original cartridges, so they are perfectly suitable for the different printer brands. As a result, our cartridges offer great value for money, but we never compromise on quality. We ensure every cartridge is tested before it is dispatched and all our machinery has been tailored to our specification to ensure our cartridges provide an excellent print finish.

- **Research and development**

We work with our suppliers at the R&D stage to ensure our inks are produced to strict specification standards. We are constantly researching and developing new inks and processes, which means our range is always top of their game.

Our customers always come first

We strive to provide customer service that is second to none. Our team is highly experienced across all the industry sectors we cater for and knowledgeable in color-management and the standards required. Our customers have access to technical expertise whenever they need.

- **Perfect fit**

We only remanufacture our ink cartridges from used original cartridges, so they are perfectly suited to all major printer brands. They are produced in-house, allowing us complete control over the filling process and ensuring we only supply the highest quality product.

Top color control

The inks we use have minimal metamerism qualities, ensuring there is minimal color difference when the colors are viewed under different light sources. They are also rigorously tested to ensure they are fit for purpose in their relevant market segment and printer brands. For example, our Colormagic

proofing ink cartridges are tested to ensure they achieve Fogra, Gracol and SWOP passes with most major RIPs in the market.

- **Tried and tested**

We have a printer for every ink cartridge we supply and we test all our products thoroughly before releasing them. This means our return rates are exceptionally low. In the unlikely event you do have a problem, all our products are covered by **our guarantee** and the team is always on hand to help.

Finger on the pulse

Doing our own R&D means we know what you need and can advise our ink suppliers on exact requirements. This allows us to add new products to our product ranges when new printers are released. For example, remanufactured inks for HP Z6200 poster production and HP T7100 architectural CAD ink cartridges, both coming soon

DISCOVER WHY OUR CUSTOMERS KEEP ON COMING BACK TO COLORMAGIC.

"We have been distributing the Colormagic ink range to our client base for over 4 years now. It's a great product and they are experts in this field. And our customers are happy too!"

 **Anthony Dunning, Sourcemia**

"We are a German distributor of Colormagic inks and have been selling their inks for over three years. We know it can be difficult to convince printer operators to use compatible ink, especially when they've had bad experiences. However, that changed when we were introduced to Colormagic and their quality inks. Simon, the managing director, reassured us that their ink cartridges were tested using the most stringent quality tests and they only used the highest quality inks. He was really helpful throughout the process and offered us a trial of the range. After a few trials we took on several of the Colormagic inks and our customers love the fact they can save money with a product they trust. Plus, the Colormagic team are always on hand if we have any issues."

 **Udo Kotzmann, Mediatronics**

"We've been using inks and proofing media supplied by Colormagic since 2006. During that time they have always performed well, the prices are very competitive and there is an efficient next day delivery service, which makes Colormagic an excellent source for remanufactured large format consumables."

 **Alan Bramall, The Artisan Press Limited**

"At Kall Kwik Chiswick, we've been using Colormagic for over 5 years. In that time they have always performed perfectly. We've never had any problems with the quality of print or the cartridges. The next day delivery is very efficient and prices great. All in all a great company to get your remanufactured large format supplies from."

 **Jonathan Bower Kall Kwik Chiswick**
